- Key Features

# Occasion Profile Module

A highly **visual snapshot** of **one occasion** by graphically displaying **5Ws key metrics**.

The module is designed to make quick inferences. The output provides a view to performance change from previous time periods and whether a particular attribute is significantly doing better than the rest.

Generate insights by pulling data in a format which will highlight patterns and differences. Few examples of business questions that can be answered.

Which categories/brands have the highest share in an occasion?

What are the different motivations that drive an occasion?

Which demographic cohorts are consuming more in an occasion?

Which channels are performing better for an occasion?

What are the key activities in an occasion vs overall occasions?
